PROFESSIONAL SUMMARY

MERN Stack Developer and Full Stack Web Developer with hands-on production experience building and deploying real-world client applications that serve live users. Delivered complete web solutions for actual businesses — including a live healthcare platform and a corporate website — with measurable performance improvements. Skilled in React.js, Node.js, Express.js, and MongoDB with expertise in REST API design, JWT authentication, and responsive UI development. Proven ability to integrate third-party services such as email APIs and form automation tools. Ready to contribute from day one.

TECHNICAL SKILLS

Frontend: React.js, Redux, Context API, React Router, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Development, JWT Authentication, bcrypt, MVC Architecture

Database: MongoDB, MongoDB Atlas, CRUD Operations, Role-Based Access Control

Tools: Git, GitHub, Postman, Axios, VS Code, Vercel, Netlify, Render, Brevo Email API, Google Forms

Core Concepts: Full Stack Development, Responsive Web Design, Component-Based Architecture, Secure Authentication, Agile Collaboration, Problem Solving

WORK EXPERIENCE

Junior Web Developer (MERN) | LAX360 Pvt Ltd

Dec 2025 – Mar 2026

- Built and deployed full-stack web applications using React.js, Node.js, Express.js, and MongoDB for production use
- Designed and integrated RESTful APIs improving data handling efficiency and reducing average API response time by 25%
- Implemented JWT-based authentication with role-based access control, securing all application endpoints across user roles
- Developed modular, reusable React components reducing frontend development time by 30% across the team
- Optimized application performance achieving faster page load speeds across all device types
- Collaborated with cross-functional teams in an Agile environment to deliver scalable, production-ready features on schedule

PROJECTS

LAX360 Full Stack Application — www.lax360.in/

2026

- Built a complete full-stack business platform using MERN stack with JWT authentication and protected routes
- Designed RESTful APIs enabling real-time CRUD operations and seamless frontend-backend data communication
- Integrated Brevo (Sendinblue) email API to automate transactional emails for contact and inquiry submissions
- Connected Google Forms with backend to streamline career applications and contact data into a centralized workflow
- Developed scalable, reusable UI components improving maintainability and reducing code duplication across the app

Zion Groups Business Website — www.ziongroups.com/

2026

- Developed and deployed a production-ready corporate website currently live and serving real business users

- Built fully responsive, mobile-first UI using React.js with modern design patterns and smooth navigation
- Achieved 30% reduction in page load time through performance optimization and efficient component rendering
- Ensured cross-browser compatibility across all major browsers and screen sizes

SD Physiocare Healthcare Platform — www.sdphysiocare.com/

2026

- Built a live healthcare service website from scratch, currently serving real patients and clinic staff
- Implemented mobile-first responsive design improving accessibility and user engagement across all devices
- Integrated contact forms with backend validation for appointment and inquiry management
- Optimized UI performance and eliminated unnecessary re-renders for a smooth user experience

Real-Time Chat Application — chat-app-j8av.vercel.app/

2026

- Built a full-stack real-time chat app using MERN stack with JWT-based authentication and secure user sessions
- Designed REST APIs for messaging and user management with optimized response times and reduced latency
- Built responsive chat UI with efficient React state management for smooth, real-time message delivery

INTERNSHIPS

Web Development Intern | [Infoem Software](#)

May 2024 – Jun 2024 • On-site

- Built responsive web pages using HTML5, CSS3, and JavaScript with cross-browser compatibility
- Applied modern UI/UX practices and developed reusable frontend components for scalable web development

Java Full Stack Intern | [Tap Academy](#)

Jan 2025 – May 2025 • On-site

- Gained hands-on experience in Java OOP, exception handling, and full-stack development fundamentals
- Built interactive web interfaces and practiced frontend-backend integration and problem-solving skills

EDUCATION

B.E. in Computer Science

[Sri Ramakrishna Institute of Technology, Coimbatore](#)

Nov 2021 – May 2025

- CGPA: 8.0 / 10.0

CERTIFICATIONS

- MERN Stack Development — GUVI (2025)
- Python Basics — HackerRank (Sep 2025)
- Introduction to Internet of Things — NPTEL (Jan – Apr 2023)
- Business English Certificate — Cambridge English (2021 – 2022)
